The monthly Financial Statement as presented by the Secretary-Treasurer was accepted by the Council and placed by the Council.

Moving adjourned on motion of Council Member Brown.

Next meeting on Tuesday, April 1st, 1936, at 10:00 a.m. (Statutory meeting).

Random Notes

It is reported that the Alberta government is planning a series of conferences with the municipalities in connection with financial problems; also, that a suggestion has been made by the Provincial Treasurer Homan that Sales Tax might be imposed, to be collected by the province and allocated to the municipalities for the purpose of reducing property taxes.

Already, in the correspondence columns of the press, a note of the session with a short devotional period and a few words of welcome.

Rev. A. Lockman, of Munson, gave an interesting address on the "Purpose of the Sunday School Institute." The afternoon was then consecutively spent with alternate showings of films on the work of the Sunday School Institute.

IT WAS A GREAT DAY!

Advertisement for Elephant Brand Fertilizer, featuring a large illustration of an elephant and text describing the product's benefits for agriculture.

When St. Patrick's Day rolled around March 17, it was a rare day when Canada television would be up to its ears with Irish songs—whether they be sung by Irishmen or not. Here are four such gatherings from CBC-TV: (1) to P. Don O'Connell, "showtime," Murray of "The Billy O'Connell Show," and O'Connell himself, O'Connell, the only Irishman of the bunch, doesn't mind their intrusion on the Irish theme. Says he, "After all, everybody in the world is either Irish or wishes he were."

Of 13 bushels per acre in 1918 and the highest average, up to that time, of 14 bushels per acre in 1935. Again when world yields are grouped in periods of two or three years, the variation is even less significant.

But there is another consideration, of course, and that is the geographical distribution of the world wheat crop which may, in itself, be an important factor.

And then, in 1935, the world wheat crop was 1.9 bushels below the lowest average.

Card of Thanks
I would like to thank many friends for the cards, flowers, and gifts received by a patient in the Regina hospital.

Mrs. M. Williams

HEADED RESCUE MISSION—Rear Adm. George Duflos, who led the dramatic rescue of six survivors of a plane that crashed on the Atlantic coast nine years ago, again headed a rescue mission, this time for seven men believed a plane doomed on a flight "home" to little America from Byrd Land.

NEAR SIMPSON'S HOME ROBBED—Miss Simpson, former wife of ex-Mayor William O'Dwyer of New York, holds up empty jewelry box in her N.Y. apartment which was robbed of \$5,000 worth of gems. A former model, Miss Simpson now holds fashion shows in U.S. centers.

KEEPING GRANDPA'S PIPE LIT—Marie Christine Amont, nine-year-old daughter of French actor Jean Pierre Amont, lights the pipe of her grandfather, Jean Boucquet, with whom she lives in New York. Her father obtained custody of her in court after the sudden death of her mother, actress Marie Monty in Paris, in 1931, and was appointed guardian of both the person and estate of his daughter, whose property is said to include an inheritance from her mother.

COURAGE IS HER FATHER'S BONNET—The legs are weak, but there's nothing wrong with the leg, heavy grin of the year's Rader Seed Child, Clara Jo Fremont, four of Miami, Fla. Born with a crippling condition, she's symbolic of the thousands of crippled children who benefit from services financed by the annual sale of Rader Seed. Nationwide appeal for funds is made by the National Society for Crippled Children and Adults.

A ROCKY MOODING—The storm-battered Norwegian ship Derfflinger is hard aground on the rocks in the Portland Firth off the west coast of Scotland as the fall victim to raging seas and howling winds. A lifeline hung away after it was abandoned when the crew of 41 were picked from the vessel by three RAF helicopters during a shuttle rescue service.

LENTINE 'FRESH' SPECIMENS—Fish join the ranks of bird watchers for perhaps the first time, in this unusual gathering in London, England. Children are in a numberless city, surrounded by the water. (Caption was a feature of the 12th annual National Exhibition of Captured Birds and Aquatic.

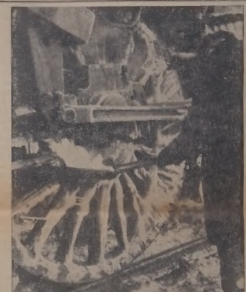

WHAT DID THEY DO WITH THE LAMP'S—Lamp shades the stress for summer are going to be the thing. If these examples are stress in fashion's spring breeze, shown recently in New York City they are. From left: Yellow stripe with small bow, white stripe with draped, pointed side trim; horizontal beige stripe.

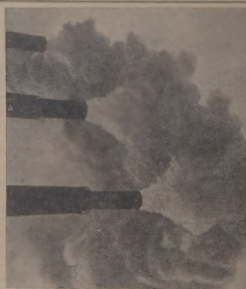

CHARLES MER, 17-year-old Birmingham, Ill., high school student, wanted some firsthand advice to write a paper on Russia's forestry service. He claims he completed a trans-Atlantic rally to the Kremlin and talked with the Soviet Premier.

THIN CRAFTS—Robert Johnson, poster for a wine importing firm, invents from the thought of men long dead as he reads his father's diary on his "perfect meal" in London. It was created in 1941 on orders of the chairman of St. George's Church, the far corner of parties and others carrying jobs.

LOCKED MUSCLES—The cold seizes into the muscles of an inch horse in Germany, in the engine into a wheel of hot steam from the boiler to get his steel back into service.

BRANDSIDE—Heavy guns in the fight of light against darkness blunder in this dramatic view of power. No long office of a ballroom are built on this picture suggests. Turn the page one-quarter turn to the left, and you'll see them in proper perspective. There's smoke-escape of Commonwealth Edison's electric light plant at Chicago, Ill.

WIDE WARMED—Two 80-125 isn't too big for the largest at Old Air Force Base, Massachusetts. The building is specially designed to house the huge, four-engine radar search planes in this manner. Crews can work under similar as they check equipment around some portions of the ship. When on patrol, the huge ships extend our radar warning network far out to sea using the nation's own coast.
